SUMMARY

I am a **Full Stack** Engineer with **4 years** of **experience** in open-source projects and a recent graduate of **Afeka College of Engineering**, where I earned a degree in **Software Engineering**. During my time at Afeka, I developed fullstack applications, which you can view in the **projects** section or on my [GitHub](#) page. These projects utilize technologies such as **Java, Spring Boot, JavaScript, TypeScript, React.js, Redux, HTML, CSS, Tailwind CSS**, and **databases** like **MongoDB, Firebase, MySQL**, and **PostgreSQL**.

I started my career as a **Network and Threat Support Specialist** at Bynet Business, where I built a strong foundation in network infrastructure and security. This experience has been crucial in **securing** the **applications** I develop, using technologies like **JSON Web Tokens (JWT)** and **Keycloak** to ensure robust security.

I am confident that I would be a valuable asset to your company, both as a developer and as a team member. Thank you for considering my application.

SKILLS

- **Frontend:** HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React.js, RESTful API
- **Backend:** Java, RxJava, Spring, Hibernate, JSON Web Tokens (JWT), Keycloak, Docker, JUnit, MongoDB, Firebase, MySQL, PostgreSQL, Git, OOP, SOLID
- **Soft Skills:** Communication, Problem-solving, Adaptability, Creativity, Attention to detail
- **Languages:** Hebrew - Native, Russian - Native, Ukrainian - Native, English - Fluent

EDUCATION

- | | |
|---|-------------|
| Bachelor of Science (B.Sc.) in Software Engineering , Afeka College of Engineering | 2020 - 2024 |
| Frontend Developer , Hilel IT School | 2022 - 2023 |
| • GPA 100. Link to certificate - click me | |

PROJECTS

- | | |
|--|------|
| VolunNear Frontend Repo , Backend Repo | 2024 |
| • VolunNear connects volunteers with organizations, making it easy for both sides to find and manage opportunities. With a user-friendly interface, it streamlines the process, saving time and ensuring a smooth experience for all involved. | |
| • Technologies Used: Java, Spring Boot, JWT, MySQL, Docker, React, Typescript, TanStack Query, Chakra UI. | |
| HealthApp | 2024 |
| • HealthApp is an innovative platform that revolutionizes personal health and nutrition management through tools and features for informed decisions about diet, fitness, and wellness. | |
| • Technologies Used: Java, Spring Boot, MongoDB, Docker, Swagger, JUnit. | |
| Search App - Rick and Morty | 2023 |
| • A React application leveraging the Rick and Morty API to enable multifaceted character and episode searches. | |
| • Technologies Used: React, TypeScript, Redux, Tailwind CSS. | |
